WATAS  **FTANA**
Futureproofed water softeners

Our new technology aims high

Who are we?

We are a reliable manufacturer and distributor for professional B2B partners in domestic water treatment. We offer a wide range of water softening systems and components for domestic use. We aspire to provide our partners with the highest quality water treatment systems and services, in which we strive on building solid and long term relationships with our partners. Because at the end of the day, **their success = our success.**

PREFACE

The water softener effect...

Consumers worldwide are striving for sustainability and quality. We, too, as a manufacturer of water softeners, need to do our bit. Our products play an essential role here. We help you offer the most sustainable and ecological appliance in which the consumer's comfort is the most important.

Every day, we are working on innovative and new techniques that will bring you and the consumer into a new era of water softening.

A close-up photograph of a spiderweb covered in dew drops, with a semi-transparent blue text box overlaid on the left side. The text box contains the text "Water softener suitable for limited spaces" in white, sans-serif font. The background is a soft-focus image of a spiderweb with numerous water droplets of varying sizes, creating a bokeh effect. The overall color palette is light blue and white, giving it a clean and fresh appearance.

Manufacturer of unique high qualitative watersoftener

What we offer you

We are happy to help you develop good technical and commercial knowledge. Our training consists of both technical and commercial support. You can count on professional activity in which the practical, as well as the theoretical, is covered.

What we mean for the installer

- choice of private label/white label
- large stock of spare parts
- only professional customers
- training by professionals
- solid support
- quick communication with a single point of contact

What our devices mean in the field

- easy and quick to install
- equipped with installation kit
- low reactive service

What we stand for

Thanks to the high expertise with the domestic end-user, we continuously develop economic and future-oriented water softeners using sustainable materials. As a manufacturer, we think and work alongside our installers and distributors to establish a long-term relationship. Our focus is entirely focused on the residential market where the European base is located in Belgium.
